- Radio will provide 2 codes?
  - ↳ green code for final code combination
    - ↳ restarting the
  - ↳ morse code

- Mosquito Broker : 10.8.166.20

  → ubilab , pw: escape!

- don't forget to put Ferdi' name on both radio and world map
  - ↳ make clear it belongs together

To Do

- Encode control & Circuit
- Display control & design (LVGL ?)
- Recordings play from SD card → to speaker
- 3D print design of buttons
- design of radio → wood , 3d print
- MQTT

- **Puzzle 1:**
  - display bars must be controllable by encode
  - 1st recording plays repeatably
    - ↳ volume adaptable by 4th encoder
  - there's one encode configuration where flag is set → screen changes
    - → puzzle solved
      - → recording stops
        - ↳ other recording starts

- **Puzzle 2:**
  - display shows characters
  - repeatedly played recording of Ferdi's message
  - touching characters on screen will make them appear in empty spaces (——————) on screen if they are correct, and then the characters dissapear from where they have been before
  - when the right word was entered ("manual"), display changes again, voice recording stops
    - ↳ green code displayed
